

Won J. Jun Joins ID Technology Partners

NORTH POTOMAC, MD, January 11, 2010 – [Identification Technology Partners, Inc.](#) (IDTP) announced that Won J. Jun has joined IDTP. Mr. Jun has over 18 years of professional experience in secure IT system integration, and is a recognized expert in smart card systems and Identity and Access Management (I&AM). His broad background includes technical, managerial and consulting roles with ASI, Booz Allen Hamilton, Accenture and Giesecke & Devrient (G&D), where he supported high-visibility government and commercial contracts that included federal, state, military, telecommunications, energy, transit and financial sector projects.

Mr. Jun received his Masters degree in Computer Science from Johns Hopkins University and his Bachelors in Computer Science from Virginia Tech. He also holds Project Management Professional (PMP) certification and Certified Information Systems Security Professional (CISSP) credentials. His applied experience embraces smart cards, Public Key Infrastructure (PKI), FIPS 140, FIPS 201, HSPD-12, ID credentialing, biometrics, Independent Verification and Validation (IV&V), and Electronic Benefits Transfer.

“Our company performs on the leading edge of identity and security technologies,” said Paul Collier, President of IDTP. “Won’s knowledge and distinctive skills are an asset to our firm. His joining the IDTP team enhances our ability to provide the world-class expertise that our clients have come to rely upon.”
