# ID Technology Partners Receives GSA's HSPD-12 Vendor Certification

**North Potomac, MD – March 26, 2007 –** Identification Technology Partners, Inc. (IDTP) announced today that it has successfully completed the General Services Administration's evaluation processes for HSPD-12, SIN 132-62 vendor certification. IDTP has been granted its certification for "Pure Integration Services" by GSA's Center for Smartcard Solutions.   Under this process, IDTP is approved to provide contracted HSPD-12 PIV compliant integration services to federal agencies and other entities issuing individual Task/Delivery Orders in accordance with FSC 70 SIN 132-62, HSPD-12 Product and Service Components.

IDTP is solidly involved in identity credentialing.  "Clearly, HSPD-12 credentialing is a challenging initiative in the government", Alan Zimmerman, IDTP Partner and Business Development Manager commented.  "Our organization is providing strong support and direction from our recognized knowledge of PIV compliance, and real experience in identity program development and system operations."

"IDTP's Partners and Associates have been involved in domestic and international biometric programs and smartcard initiatives since the early 1990's," remarked IDTP's COO Stephen Hunt. "A large part of our work recently has been to consolidate identity credentialing technologies into operational systems.  We believe IDTP's GSA HSPD-12 certification enables easier access to our background and expertise to support the developing PIV programs."

**About Identification Technology Partners, Inc.**
IDTP was formed in October 2000, and is a leading Washington D.C. area based consulting firm with an independent focus on the personal authentication industry.  IDTP has assembled a partnership of recognized industry experts, and serves clients with technical and business related requirements in the government and commercial markets.  IDTP's applied experience in secure identification systems, including biometrics, smart cards and cryptography, has influenced today's system design concepts for strong personal authentication and secure identity credentialing.
